

School Garden New Generation Northeastern Madagascar

SCHOOL GARDEN VISIT AND TOUR

The school garden is a center of environmental education located in the SAVA Region of northeastern Madagascar. The site is by car max. 45 minutes away from the airport and 35 minutes from Sambava center. At the site we demonstrate mixed agroforest systems such as with vanilla, fruit trees, native forest trees, medicinal plants and with annual crops. We have a fishpond, do poultry farming and raise goats. The school garden has a classroom with a library, bungalows for sleeping and a picnic area for hosting events. Additionally, you can find wildlife there like reptiles, amphibians and birds. You can take a walk to a viewpoint to see the big and beautiful lake Antohomar and the surroundings of Sambava city.

It's possible to do a tour with a pirogue to go back to the city, the tour will take about 2 hours. For lunch, we teach all visitors how to use traditional Malagasy plates and spoon made of ravinala leaves (an endemic palm from Madagascar). In addition, we offer natural Malagasy cuisine with local fruits, vegetables and rice. 70% of our food is harvested in our garden. The visitors will be able to taste the crops produced in our garden. If you stay overnight, you'll have the opportunity to see animals which are active at night (bats, amphibians, reptiles, insects etc.).

How to get there:

By car / motorbike ca. 25-35 min from Sambava or by foot ca. 2h from Andranomatsiko

Address: Secteur 1 Ambatofitatra, Sambava 208, Madagascar
